**One Gameful Approach: A Report from the Classroom**

*In Person Workshop  
Wednesday, November 9<sup>th</sup>  
from 12:00 – 1:30pm EST*

***Does a Gameful approach work in Engineering courses?*** This in person session will discuss how faculty worked to redesign their course to add important ingredients that reflect principles of GL: allowing and encouraging students to accumulate points toward a grade, modular assessment measures that offer students multiple options and paths to success; frequent feedback; and transparency about assignments and evaluation. We will share preliminary findings from the student focus groups, instructor and TA interviews, survey data and observations.

Click [here](#) for further details and to register for this workshop. *Once registered further details will be shared on location.*

For additional information, contact [Amy Svirskey](#), Learning Assessment Specialist.
